Pine Knoll Shores, NC 28512
Telephone (252) 247- 4353

MINOR LANDSCAPE APPLICATION

A Minor Landscape Permit applies when construction takes place having little or no land disturbance, no adverse drainage impact on adjacent properties, little or no tree removal, or other adverse impact on adjacent properties as determined by the Building Inspector. This type permit shall be issued in conjunction with a Building Permit. Representatives of the Community Appearance Commission and the Planning Board shall review a completed minor landscape permit application and accompanying building permit application within 30 days of receipt by the town and either approve, approve with conditions, or disapprove.

A minor landscape permit shall expire 90 days after issuance unless work authorized by the permit has started. If after commencement of work there is a work discontinuance for a period of twelve months, the minor landscape permit and building permit shall immediately expire. No work authorized by any permit that has expired shall thereafter be performed until new permits are secured. The Town Manager may require, at the owner's expense, restoration of the property to its appearance before re-issuance of the now-expired permits.

Removal of unauthorized trees may result in town fines and/or tree replacement requirements by owner.
